

# 11 tips to make your project more sustainable:

## 1. Travel green

Avoid traveling, or choose low carbon options such as train, bus, or ship.

## 2. Choose environmentally responsible food

Provide local, seasonal, organic, and mainly vegetarian food.

## 3. Minimize consumables, and choose eco-friendly options

Buy only what's necessary to fulfill the aims of the project, and choose products with ecolabel.

## 4. Educate yourself on environmental topics

So you can better educate others.

## 5. Include environmental education in the curriculum

## 6. Encourage critical thinking and systems thinking

To make better decisions and uncover greenwashing.

## 7. Choose an eco-friendly venue

One which is generally concerned about minimizing its negative impact on the environment.

## 8. Encourage participants to behave in an eco friendly manner

Saving water and electricity, using consumables mindfully...

## 9. Use the outdoors

To save electricity, connect with nature and think better.

## 10. Maximise the impact of your project

We are traveling, consuming resources, utilizing public funds... make sure you reach the maximum number of beneficiaries.

## 11. Lead by example

Coherence is key. Become as eco-friendly as possible, and your messages will be more respected and followed.
